

Box AI Explainer Series

AI Education & Thought Leadership · Box

As AI adoption accelerated, customers and field teams struggled to understand concepts like RAG, AI Agents, governance, and enterprise readiness. I partnered with Box's CTO to create an educational content engine that simplified complex topics while reinforcing Box's AI narrative.

Outcomes

- 500K+ video views
- Became a core customer and field education resource
- Increased visibility of Box's AI strategy and executive perspective

Key Learning

The biggest barrier to AI adoption is often understanding, not technology.

AI Narrative & Thought Leadership

Market Creation & Positioning · Box AI

In a crowded AI market, feature-centric messaging made differentiation increasingly difficult. I helped shape Box's AI narrative around trust, governance, content intelligence, and workflow transformation through thought leadership, webinars, analyst engagement, and industry publications.

Outcomes

- Expanded Box's AI market presence
- Established executive thought leadership
- Increased engagement across customers and industry audiences

Key Learning

Winning narratives focus on customer outcomes, not technical capabilities.

AI Certification Program

Internal Enablement & AI Fluency · Box

As AI innovation accelerated, teams across the company needed a shared understanding of Box AI capabilities, use cases, and messaging. I created Box's foundational AI certification program to establish company-wide AI fluency.

Outcomes

- Scaled AI education through a structured certification framework
- Enabled more consistent AI messaging across teams
- Adopted as a mandatory company-wide certification

Key Learning

AI adoption starts with AI fluency.

AI in Action Series

Customer Education & Product Storytelling · Box AI

Customers needed practical examples of how AI could solve real business problems. I built and scaled a demo-driven content engine showcasing real-world Box AI use cases through repeatable, customer-focused storytelling.

Outcomes

- Increased velocity of AI demo production
- Improved consistency of AI product storytelling
- Enabled broader cross-functional contribution

Key Learning

Storytelling scales when the process behind it is systematized.

Build Your Own Agent Workshops

Hands-On Adoption Programs · Box AI Studio

Many customers were interested in AI Agents but lacked confidence in how to build and deploy them. I designed interactive workshops that helped customers move from curiosity to implementation.

Outcomes

- Strong engagement and participation
- Increased confidence in agentic workflows
- Improved readiness for AI Agent adoption

Key Learning

The fastest path to adoption is participation.

→ Dive Deeper

AI Agents Playbook

AI Adoption Frameworks · Box AI Studio

As interest in AI Agents grew, customers needed practical guidance on where agents fit and how to deploy them effectively. I authored a two-part playbook covering enterprise use cases, governance, implementation, and adoption.

Outcomes

- Created a foundational resource for AI Agent adoption
- Established a common framework for agent discussions
- Extended Box's AI education strategy beyond launches

Key Learning

Customers adopt AI Agents faster when they have clear starting points tied to everyday workflows.

Secure RAG: Building Trust in Enterprise AI

AI Trust & Technical Positioning · Box AI

Enterprise buyers needed a clear understanding of how Box AI handled data, permissions, and security. I created Box's Secure RAG narrative and architecture framework to simplify complex technical concepts and build customer trust.

Outcomes

- Became a high-demand customer and sales asset
- Reduced friction in security and architecture conversations
- Supported AI activation and enterprise deal progression

Key Learning

Enterprise AI adoption is fundamentally a trust challenge.

AI Discover Page

Product-Led Growth & Adoption · Box Admin Console

Despite strong awareness, many administrators needed a clearer path to understanding and activating Box AI. I helped create an in-product destination that connected education directly to activation.

Outcomes

- ~4x higher weekly AI usage
- ~750 additional enterprises enabled
- 2–5x higher AI engagement across customer segments

Key Learning

The highest-performing adoption experiences embed learning directly into the workflow.

→ **Dive Deeper**

AI in Action: Scaling Demo Creation with AI Agents

AI-Powered Operations & Scale · Box AI Studio

As demand for AI demos increased, a manual creation process became a bottleneck. I built an AI Agent and workflow system that transformed demo creation into a scalable, self-serve process.

Outcomes

- Reduced demo creation time from days to hours
- Scaled from single-owner to cross-functional contribution
- Established a repeatable AI storytelling system

Key Learning

The best AI workflows improve the quality of inputs, not just the speed of execution.

→ **Dive Deeper**

Box AI Product Launches

AI GTM & Product Launches · Box

Launching multiple AI products required a unified narrative across customers, sellers, and executives. I led GTM strategy for Box AI Agents, AI Studio, AI Extract Agents, Box Agent, and AI Trust Center.

Outcomes

- Successful global launches

- Company-wide enablement adoption
- Consistent AI messaging across teams

Key Learning

Launches succeed when positioning, enablement, and adoption operate as one system.

→ **Dive Deeper**

Box AI Units

AI Monetization & Pricing Strategy · Box

Traditional software pricing models struggle to capture AI value. I led GTM strategy for Box AI Units, helping customers understand, measure, and manage AI consumption through a value-based framework.

Outcomes

- Improved customer understanding of AI value measurement
- Reduced friction in pricing conversations
- Supported expansion into Enterprise Advanced opportunities

Key Learning

AI monetization succeeds when customers can clearly connect usage to business value.
